

## **Facility Engineer or Project Manager Needed**

5/10/05

My name is Larry Torkelson and I work with Malcolm Henry here at Beckman Coulter in Fullerton. We are looking for another facility engineer or project manager to work in our facility department. We hire new people on as temps and if everything works out we may hire them on permanently in 6 to 12 months. We have 7 engineers in our department and we all were hired as temps to start with.

We are looking for someone who can take a project from start to finish. Our projects normally are involving modifications to existing areas due to expansion, relocations, new system furniture or something like tenant improvements. We use AutoCad to do the layouts, do cost estimates and use in-house maintenance or work with outside contractors to do the job. Most of the work is at our Fullerton or Brea facilities. However we do have facilities in Miami, Minnesota, Palo Alto and a number of other locations where we might be asked to do a project. If you have any questions please give me a call at 714-981-5840. We have a couple of larger projects right now and need someone right away. You can send resumes to me at the following email address if you like.
