
How do you get three sheets of nine feet by nine feet ¼ inch glass from the first floor to the third floor at the Turnip Rose?

We thought that the glass contractor had everything all worked out until the night of the actual delivery. It turned out that the scissor lift which had been scheduled did not function correctly after being delivered and left us with quite the dilemma. We had a final inspection with the city scheduled for the next day so it was mandatory that we get the glass in its proper place and on time.

Who can you call to get the adequate help needed?

Doug Green of Sun State Equipment Rentals came to the rescue of RMC, even at 7:00pm. You're probably wondering how we would be able to get a hold of *Doug Green* after business hours. Well, with his involvement with quite a few committees in IFMA the committee chairs have access to his cell phone number. By having this pertinent information Doug was able to coordinate our special need of getting a special scissor lift that would be able to lift a 250 pound sheet of glass from the first floor to the third floor, a whole 33 feet high! The lift also needed to be able to carry the three workers needed to support the glass sheet which was sitting on the outriggers that was hung from the left side. After reaching the third floor an additional three workers helped to raise the glass another three feet to clear the guardrail and move it into the required space. Along with their help, *Sun State Equipment Rentals* has a great delivery service. Their driver stayed to assist us in moving the lift from the street to the lobby of the Turnip Rose which was greatly appreciated.

This story is a perfect example of why our membership in the Orange County IFMA has paid off in so many ways. With members such as *Doug Green* and *Sun State Equipment Rentals*, it makes our job a lot easier whenever we need help or assistance on any facility management or construction project. Thanks to *Doug Green* and *Sun State Equipment Rentals*, we were able to meet our needs.

Thanks Doug for a job well done!
